

Equip your agent with any capability.

one mount

141 capabilities

pay per call

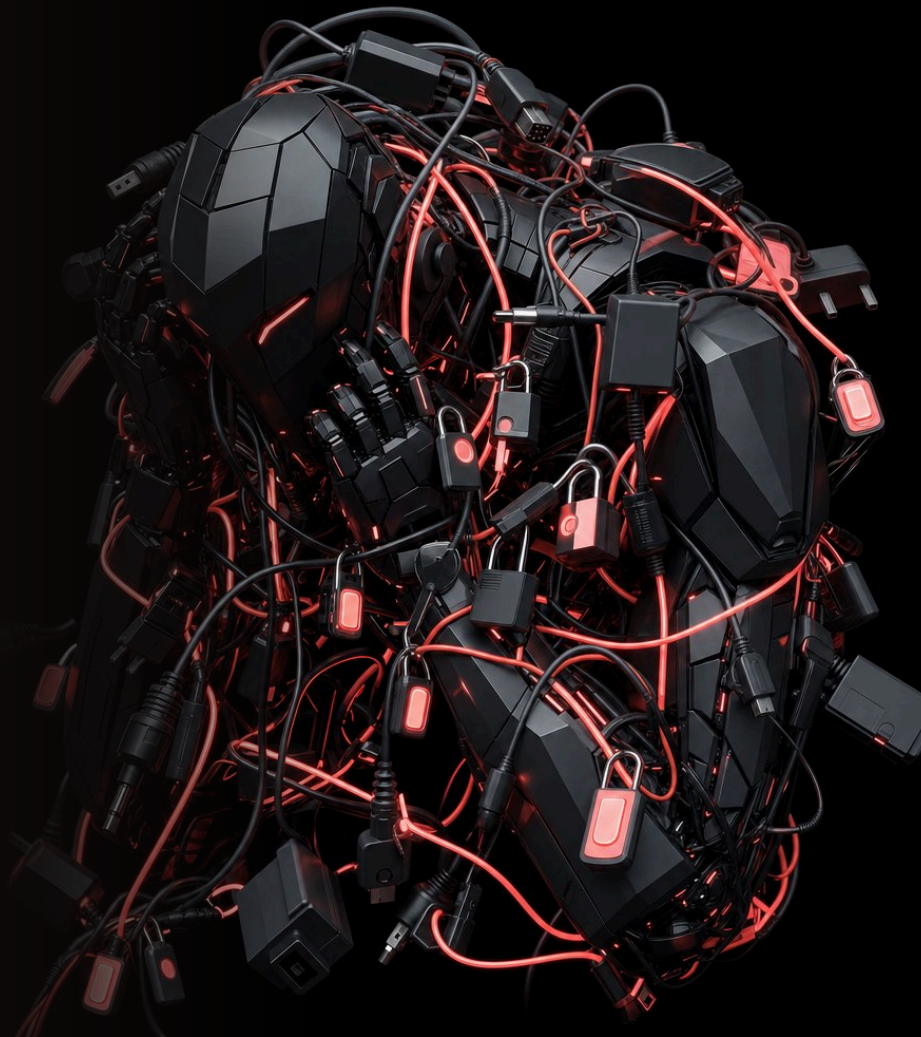

Adding one capability is easy. Adding ten is a mess.

Every provider wants its own setup before your agent can make a single call.

- | | |
|----------------------------|---------------------|
| × create an account | × 10 providers |
| × store an API key | × 10 keys |
| × pick a billing plan | × 10 plans |
| × write yet another client | × 10 request shapes |

before the first real call

40 chores

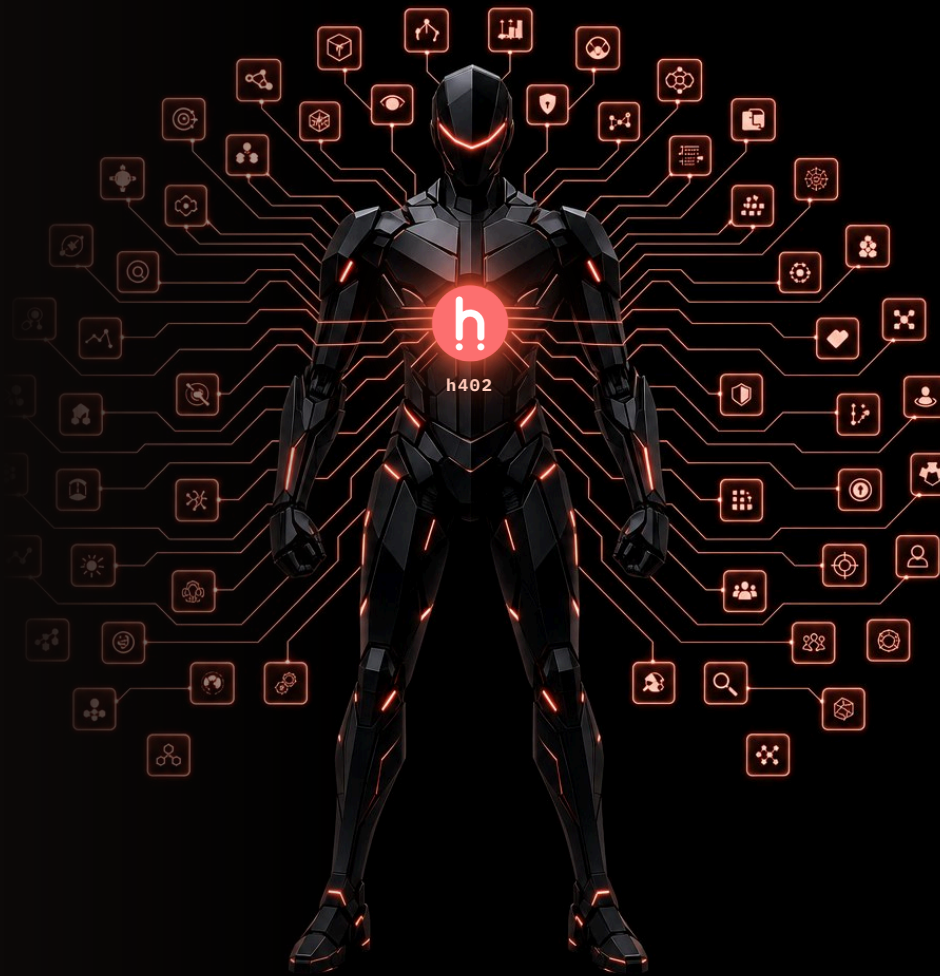

Mount h402 once. 141 capabilities come online.

One call path for everything. Pay per call in USDC on Arc.
No keys, no plans, no subscriptions.

`/routes/provider/capability`

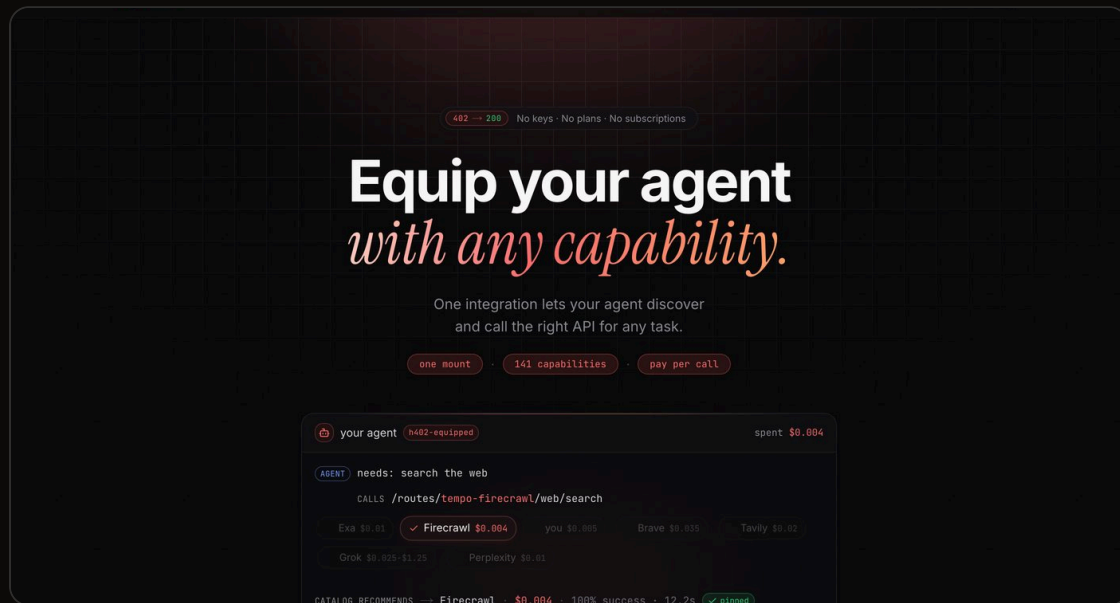

ONE CALL PATH FOR EVERY CAPABILITY

Already live on Arc Testnet.

SETTLEMENT

Our own facilitator, on Arc Explorer

Mount it. Ask what it can do.

- **Mount the h402 CLI**
One install. The agent verifies it: **demo wallet funded, catalog reachable, payment flow ready.**
- **Ask: "what can you do with h402?"**
No docs, no onboarding. Just a question.
- **The agent answers with the whole market**
Areas, providers, and USDC prices, quoted before any payment.

147 capabilities **16** categories

What can you do with h402? Show the available capabilities, providers, and prices.

Worked for 1m 8s >

The live staging catalog currently has **147 capabilities** across 16 categories. Prices below are catalog prices in USDC (1,000,000 micro-USDC = \$1); a paid request's final x402 quote includes h402's 5% buyer fee.

Category	Routes	What it covers	Catalog price range
Crypto	41	prices, DEX, RPC, wallets, smart money, perps	Free-\$0.05
Finance	15	stocks, FX, SEC, macro, research	Free-\$0.50
Social	14	X, TikTok, Instagram, Reddit	Free-\$0.06
AI	14	chat, image/video/music generation, TTS, PDF/OCR	Free-\$5.00
Web	10	search, answers, scrape, sitemap, screenshots, package search	\$0.001-\$1.25
Maps	9	places, nearby search, geocoding, IP lookup	\$0.001-\$0.08
Travel	8	flight deals, schedules, airports, aircraft	\$0.005-\$0.02
Domains	7	DNS, availability, WHOIS, SEO, technology	Free-\$0.10
Real estate	6	search, values, rents, listings, market stats	\$0.033

Give it a task. It pays for itself.

- **Task: "what is smart money buying?"**
The agent picks h402's Nansen smart-money route on its own.
- **402 → quote → sign → 200**
The route quotes in USDC, the wallet signs locally, the call returns with the result. **No key anywhere.**
- **Comes back with a live table**
Ethereum and Solana net flows, 24h against 7d, with a takeaway. Paid data, one call.

\$0.0525

PER CALL · NANSEN SMART-MONEY ROUTE
ETHEREUM + SOLANA · 24H VS 7D NET FLOWS

Using h402, find the top tokens smart money is accumulating on Ethereum and Solana. Compare their 24 hour and 7 day net flows.

Worked for 40s >

h402's Nansen smart-money flow snapshot shows modest Ethereum accumulation and much stronger Solana flows. Net flow is USD bought minus sold by Nansen's tagged smart-money wallets.

Chain	Token	24h net flow	7d net flow
Ethereum	FP	+\$3,195	+\$1,583
Ethereum	ELMT	+\$193	+\$456
Solana	CRED	+\$35,391	+\$15,188
Solana	POPCAT	+\$30,507	+\$30,507
Solana	WBTC	+\$16,616	+\$16,616
Solana	FRAGGLE	+\$11,901	+\$8,805
Solana	CUPSEY	+\$9,904	-\$13,378
Solana	JIMOTHY	+\$9,558	-\$22,634
Solana	🌱 BUTTHOLE	+\$8,626	+\$8,626
Solana	ONLYMARMs	+\$7,558	-\$45,491
Solana	LABB	+\$6,171	+\$8,881

The unusual stuff is **one call too.**

Not just search and data. Straight from the live catalog:

Video generation (async)

● 100

`/routes/stablestudio-video/ai/video-gen`

\$0.15-\$0.75 per call

Image to SVG

● 100

`/routes/svgsmith/utilities/image-to-svg`

\$0.02 per call

Search-grounded answer

● 100

`/routes/stableenrich-exa/web/answer`

\$0.01 per call

also in the catalog: math OCR · music generation · insider trades ·
Polymarket data · person lookup · geocoding ...

EXAMPLE · IMAGE TO SVG

paid \$0.021

Worked for 58s >

Converted with h402/SVGSmith and saved the editable vector as [📄 output.svg](#).

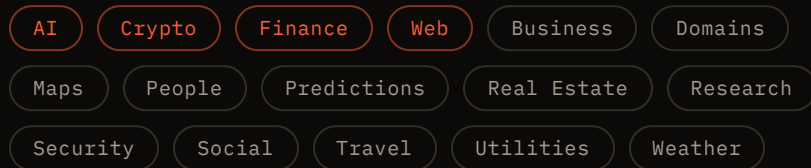

Used full-color, clean tracing at 0.9 fidelity. Cost: **\$0.021 USDC.**

the demo agent ran this route: cat photo in, editable vector out

141 capabilities, 16 areas.

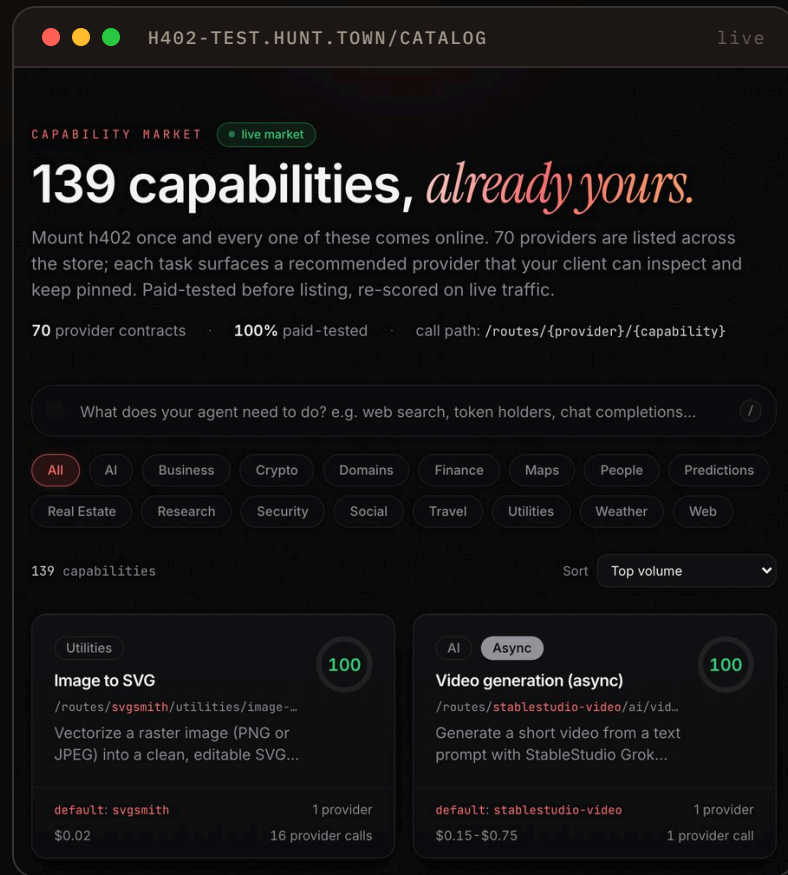

Every capability is listed with its price, its providers, and its score.

141
CAPABILITIES

71
PROVIDERS

100%
PAID-TESTED

Every provider has a score.

h402 keeps calling every route with real money and tracks what happens. The best provider becomes the default your agent gets.

The screenshot shows the h402 interface for the 'X user profile' route. At the top, there's a navigation bar with 'Capabilities', 'Builders', and 'Docs', and a 'Connect wallet' button. Below the navigation, the route is identified as 'Social' with 'GET' and 'live' status. The main title is 'X user profile' with a description: 'Look up a public X/Twitter user profile by username.' To the right, a summary box displays a green '100' H402 SCORE and '\$0.001 PER CALL'. Below this, four metrics are shown: SUCCESS 100%, P50 LATENCY 2.33s, P95 LATENCY 3.71s, and CALLS (30D) 5. At the bottom, there are two sections: 'Provider contract' showing the call path '/routes/glim-sh/default/social/x-user-profile' and method 'GET', and 'Quickstart' showing a curl command: 'curl '/routes/glim-sh/social/x-user-profile?ref=jack''.

THIS ROUTE

100/100

100% success · 2.33s median · \$0.001 per call

Sub-cent payments need **the right chain.**

Arc gives us three things no other chain does together.

01 Gasless for the agent

Agents sign an EIP-3009 authorization offchain. No transaction to submit and no gas to pay.

BUYER GAS \$0
EIP-3009 authorization

02 Done in under a second

Our facilitator settles each payment onchain with ~0.48s blocks and deterministic finality.

BLOCK TIME ~0.48s
deterministic finality

03 USDC from payment to settlement

Agents pay in USDC, our facilitator pays settlement gas in USDC, and every payment is visible on-chain.

GAS TOKEN USDC
no second token

Every paid h402 call becomes real, verifiable USDC activity on Arc.

PAID ON ARC • \$0.0021 USDC

Live on testnet. **Mainnet on day one.**

h402 is already settling paid calls on Arc Testnet. Production USDC follows Arc to mainnet.

SEP 16

2026

Production settlement

Launch the h402 buyer payment rail on Arc Mainnet with our facilitator and production USDC from day one.

DEC 2026**300+ paid-verified capabilities**

More than double the catalog and add competing providers to the highest-demand routes.

NEXT**Gateway Nanopayments**

Add Circle Gateway as an optional x402 rail for gas-free, high-frequency payments down to \$0.000001.

LATER**Portable provider reputation**

Turn verified paid-call outcomes into portable, ERC-8004-compatible reputation signals.

How big is **this**?

Honest answer: small today, and moving fast in one direction.

TODAY

\$20–30M/yr

Real x402 volume right now, once wash trading is stripped out. **Small on purpose. Nobody has won yet.**

ONE WEB2 INCUMBENT

≈\$25M/yr

Apify's 2025 revenue selling web-automation APIs. **One company, one vertical, already matches the whole rail.** It joined x402 in June.

THE SHIFT

49→95%

Share of x402 value in \$1+ payments, in six months. **Toy payments are becoming real spend.**

Every API vertical is another Apify. As that spend turns agent-native, it routes through some mount. **Ours is live, paid-tested, and on Arc.**

Three signals, **one direction.**

The market is early. The infrastructure is not.

01 · PAYMENTS GET REAL

95%

of x402 value now in \$1+ payments

02 · NEUTRAL RAILS

x402

joins the Linux Foundation

The standard we build on now has neutral governance, backed by:

AWS · Google · Circle · Stripe
Visa · Mastercard · and others

03 · WEB2 IS WIRING IN

20,000+

Apify tools opened to x402 agents

A profitable ≈\$25M/yr web2 API company now lets agents pay per call in USDC. The incumbents are joining the rail.

Serious money is entering. Nobody scores the providers.

Payment rails and tool catalogs are multiplying. h402 is the one that tests providers with real paid calls and pins the best one per route.

PRODUCT	WHAT IT OWNS	WHERE IT STOPS
Alsa	Agent payments network · \$6.5M from Alibaba + Tribe	Payments-first. Access, not quality routing.
Apify	20,000+ web-automation Actors, now on x402	One vertical, one marketplace: its own.
AgentCash	One prepaid balance across many APIs	Balance model; no paid-test provider scores.
h402	Cross-vertical capability market on Arc	Score → pin → pay per call, non-custodial

COLD-START WINDOW Deepen the paid-test score data **before the funded players add quality signals of their own.**

Hunt Town. Shipping since 2018.

Three operators, nineteen shipped products across onchain and AI.

GROWTH

Provider network, distribution

WHAT WE WANT FROM ARC

Make h402 the capability layer agents find **already mounted** on Arc.

SEP 16 Launch together

h402 mainnet ships on Arc Mainnet day. Launch support and co-marketing.

Q4 2026 Distribution

Intros into agent frameworks and Arc builder channels.

ONGOING Provider growth

Help us recruit providers, so every route has real competition.

Sources. Primary and first-party only.
